The eTwinning project: “e-Safety” focuses on digitalization in youth's everyday life. What influence does it have? Why is it so fascinating and what possibilities does it open? What are the risks? Students reflected on their media consumption and learnt to handle it safely. Students have worked on many pages concerning some of the most important topics on e-Safety, such as Fake News, Cyberbullying, Copyright, Privacy, e-Commerce and so on.

The schools involved in the project are: two schools from Italy: from Alcamo (TP) and from Pisa, then from Poland, Germany, Greece, Turkey

The conclusion of the eTwinning teamwork will be with the organization of a Safe Internet Day at partners' schools.
